Pathfinder Data API Registration

An Application Programming Interface (API) has been developed for schools and other stakeholders to interface their applications with the Pathfinder and access school(s) and outcome data. Pathfinder data is derived from multiple sources including the Workforce Longitudinal Data System (WLDS), Labor Market Information and Strategic Initiatives (LMISI), Center for Educational Performance and Information (CEPI), and College Score Card data to provide aggregated program and employment outcomes information.

Stakeholders must register with Pathfinder to access Pathfinder data. To successfully register, the User must provide their first and last name, a valid email, and a description of how they intend to use Pathfinder API data.
A success message will be displayed once the User has been registered. An email will be sent to the registered email address with the API key. The API key included in the email can be used to make web service calls to retrieve Pathfinder school and outcomes data. The email also includes a link to the Pathfinder Data Definition document.

A new API key will be generated every time an email is used to register with Pathfinder. The latest API key must be used to interface with Pathfinder.
